

**Object:** EC communication on Ebola projects

*The IF-EBOLA action benefits from the expertise of 9 partners from Europe, North America, Middle-East & Africa to operate in Sierra-Leone & Guinea. Early diagnostic by ultrasensitive virus detection will lead to an early treatment (supported by WHO & EMA) of contact-patients with horse anti-Ebola polyclonal antibodies expecting to reduce the EVD fatality rate. The immune response will be monitored.*

IF • EBOLA
