## DOCUMENT ABSTRACT

This deliverable describes the project website and social media accounts of the FVLLMONTI project.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101016776.

## Introduction

In this deliverable we provide a short description and links to access the FVLLMONTI website and social media accounts that were set up in the first 6 months of the project. This was done with the support of Absiskey, a company that specialises in providing support for research & development and innovation projects. The visual identity of the FVLLMONTI project including the logo was defined in close collaboration with Absiskey and is featured on the website and social media accounts.

## Project website

The project website shows a short abstract of the project and the main objectives, followed by a schematic overview of the five technical work packages involved and the connections between them. Next the website presents the work package leaders and the key performance indicators of the project. In addition, partners are presented together with their geographical location using an interactive map. Finally, the website gives some information about the timeline and funding of the project and provides information about news, events and public documents together with contact information.

The project website can be accessed at <https://fvllmonti.eu/>.

## Social media accounts

Two separate social media accounts are setup to build the FVLLMONTI community and to share relevant news and disseminate more widely FVLLMONTI events as follows:

Linkedin: <https://www.linkedin.com/in/fvllmonti-project/>

Twitter: <https://twitter.com/fvllmonti>
